

Now a Family Affair

An all-new Adjustable Facing Gauge and versatile, go-anywhere Siding Nail Cutter now join Malco's Overlap Gauges and Notchers to create a family of tools for fiber cement siding.

The Malco Facing Gauge is adjustable for 5", 6", 7" or 8" (127.0, 152.4, 177.8 or 203.2 mm) exposures. A "gauge block" easily snaps into desired position without use of tools or fasteners.

The new Malco Siding Nail Cutter reaches hidden nails to cleanly remove unwanted or damaged planks fast and easy. Ideal for salvaging or remodeling projects, the No. SNC is faster than a hacksaw and cuts nails that a claw hammer or bar cannot access without damaging adjacent planks.

See inside for full details >

FCG2 Fiber Cement Siding Overlap Gauges

Strong, one-piece tempered spring steel construction.

Precision-ground tip assures gauge will grip behind siding plank.

- Works with 5/16" (7.92mm) fiber cement siding.
- Permits 1-person application of siding planks by completely freeing up users hands.
- Two gauges support entire length of plank and precisely gauge a standard 1-1/4" (31.75mm) overlap in one easy step - even on a bowed wall.
- No adjustments to vary and nothing to mark.
- Will not mar finish of pre-painted siding

Place pair of gauges on top edge of lower plank as shown. Rest upper plank against outside face of the gauge stop to accurately space planks, and then nail upper plank approximately 18" (45.72 cm) away from gauge as shown at top of page at right.

Depress thumb tab to allow plank to snap flush to wall and gauge.

Remove gauge by depressing thumb tab again and lifting gauge up and off lower plank, then pulling gauge out from under top plank.

FCFG Fiber Cement Siding Facing Gauge

- More accurate and easier to use than home-made wood "preacher" blocks.
- Adjustable for precise 5", 6", 7" or 8" (127.0, 152.4, 177.8 or 203.2 mm) exposures. Gauging block easily snaps into desired exposure position without use of tools or fasteners.
- Easily held with one hand while steadying new plank for nailing.
- May be used with Overlap Gauge for 1-person application (see No. FCMS Mixed Gauge Set).
- Manufactured of tough, long-lasting, weather-resistant nylon material throughout.

Using the Facing Gauge while working across the width of the plank assures greater accuracy of the desired exposure and guards against sagging. The Facing Gauge may also be

used in combination with the Malco Overlap Gauge to prop up one end of the plank for one-person application.

FCN Fiber Cement Siding Notcher

- Scores and cuts arcs up to 4" (101.6mm) diameter in fiber cement siding planks.
- Allows for plumbing, electrical, venting or other outlets to pass through siding plank.

Mark the arc of outlet diameter to be removed from plank.

Use Notcher to score along marking to avoid fractures outside arc.

Notcher may then be used to cut all the way through plank along pre-scored line.

SNC Siding Nail Cutter

- Cuts hidden nails left-over from removal of damaged or unwanted fiber cement siding plank without damaging overlapping plank.
- Flat head with beveled leading edge easily maneuvers under edge of siding and into corners.
- Ideal for remodeling or salvaging projects.
- Precision-ground, heat treated jaws and compound handle leverage combine to cut up to 16D common nails.

WARNING

Do not use for cutting hardened nails or bolts.

Related Tools Available from Malco Products

No. 9PK QUICK OPEN KNIFE

"No tools" blade change is fast and easy with just the turn of a knob. Die-cast knife halves feature integrated hinge. Contoured shape offers ergonomic safety grip. Retractable blade mechanism advances to 3 locked positions. Comes with one blade installed. More blades store in handle.

No. L9M TORPEDO LEVEL

Aluminum frame with "cycloc" end plates stands up to job-site use. Plumb, level and 45° vials with top-read feature for quick, easy readings.

No. 20SCF CLAW HAMMER

20 oz. (570 g) straight claw with fiberglass handle and vinyl grip to minimize recoil.

No. CG10 CAULKING GUN

Standard 1/10 gallon (.038 l), spouted cartridge capacity. Painted finish housing with toothed, ratchet-action piston rod.

Reaches into confined areas.

Powerful Magnetic Surface.

Quick Release Sleeve

No. MS12 MAGNETIC SWEEP

Compact 12-inch (304.8 mm) sweep with comfortable angled handle reaches into confined areas. Powerful magnets efficiently pick up metal debris. A quick-release sleeve allows debris to be easily removed.
